

SAMPLES FROM OUR INTERACTIVE IPPS DATA DASHBOARD

McDermott+ Inpatient Prospective Payment System (IPPS) Dashboard

Updated and improved on April 15, 2025 to include 2026 IPPS Proposed Rule data and:

- Total Medicare fee-for-service cases and payments by MS-DRG through 2024 Q3
- Top primary diagnoses and procedure codes by MS-DRG
- Average cost by cost-center for all MS-DRGs, not just the top 25

About

This public dashboard provides summary information derived from CMS Inpatient Prospective Payment System (IPPS) Final Rules for FY 2021-2025 and aggregated statistics from Medicare inpatient limited data set standard analytic files. This includes:

- Average cost per inpatient stay by MS-DRG and cost-center, and national Medicare fee-for-service payment rate by MS-DRG assuming the hospital submits quality data and is a meaningful EHR user
- Total IPPS cases and payments from 2019-2024 Q3
- Most common primary diagnosis and procedure codes for each MS-DRG

McDermott+ Can Provide Tailored Analysis Upon Request

This dashboard is a very small example of what we can do. We routinely help providers, health systems, pharmaceutical companies, and device manufacturers:

- Model the financial impacts of new policy and regulatory proposals
- Profile patient populations that may benefit from new technologies, treatments, or drugs. This includes exploring the typical patient journey for selected clinical conditions, estimating the size of the Medicare population that may benefit from new treatments, and identifying opportunities to improve coordination of care
- Estimate hospital margins for inpatient and outpatient care
- Complete and submit new technology add-on payment (NTAP) applications and develop data driven strategies to support provider adoption of these new technologies

MS-DRG Specific IPPS National Unadjusted Payment Rate and DRG Weight

Select MS-DRG from drop-down menu to update data visualizations

MS-DRG 871 SEPTICEMIA OR SEVERE SEPSIS WITHOUT MV >96 HOURS WITH MCC

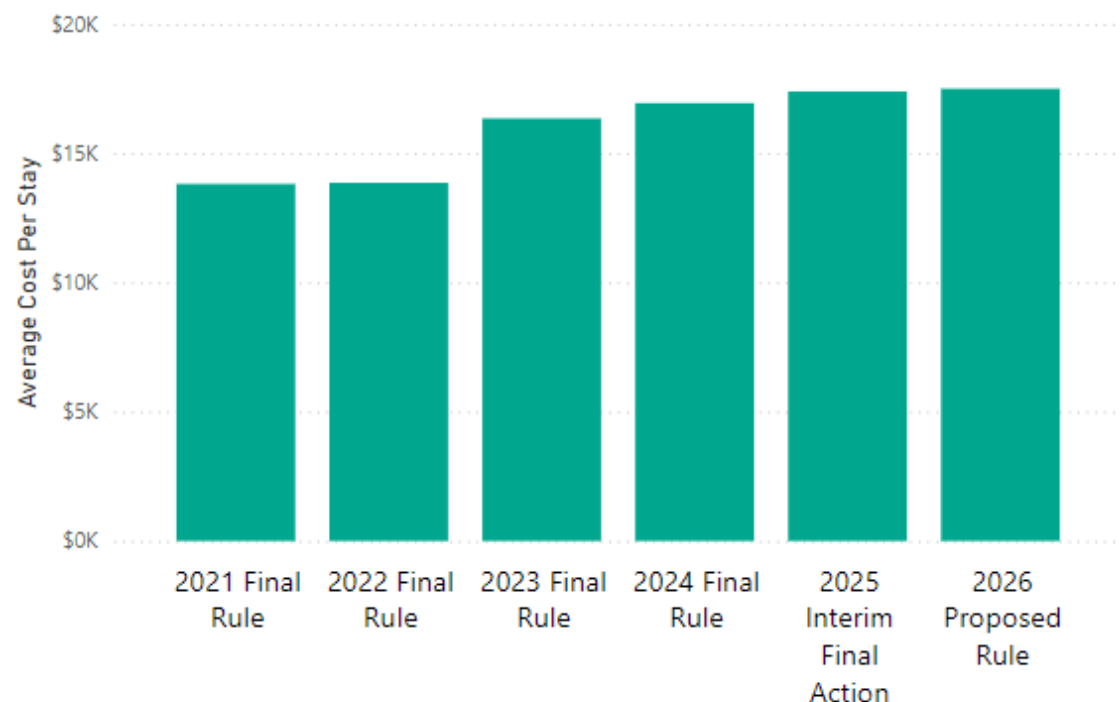

2026 IPPS Proposed National Unadjusted Payment Rate

Not adjusted for wage index, provider or claim characteristics, or sequestration

\$14,275.20

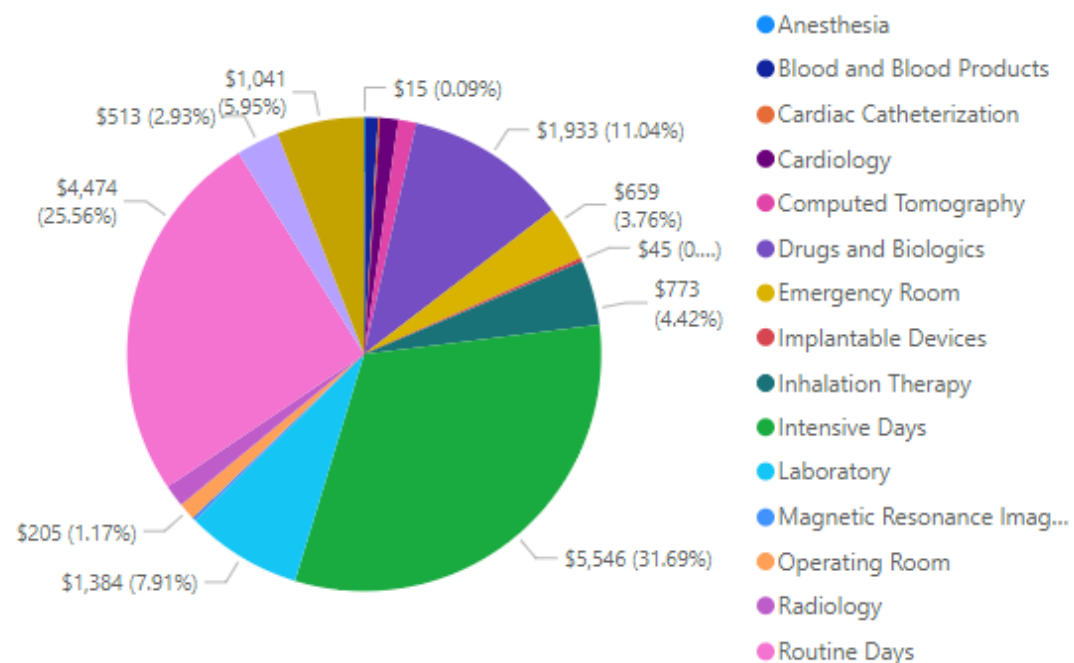

Average Cost Per Inpatient Stay

MS-DRG 871 SEPTICEMIA OR SEVERE SEPSIS WITHOUT MV >96 HOURS WITH MCC

Average Cost Per Stay by Cost Center from 2026 IPPS Proposed Rule Data

MS-DRG 871 SEPTICEMIA OR SEVERE SEPSIS WITHOUT MV >96 HOURS WITH MCC

Note: Cost data will be blank when insufficient data are available

Total IPPS Discharges by MS-DRG from 2019-2024Q3

Select MS-DRG from drop-down menu to update data visualizations

MS-DRG 871 SEPTICEMIA OR SEVERE SEPSIS WITHOUT MV >96 HOURS WITH MCC

Total Medicare Fee-for-Service IPPS Discharges for Selected MS-DRG from 2019 - 2024 Q3

MS-DRG 871 SEPTICEMIA OR SEVERE SEPSIS WITHOUT MV >96 HOURS WITH MCC

Source: M+ analysis of 100% Medicare inpatient limited data set (LDS) standard analytic files (SAF) from 2019-2023, and 2024 quarterly LDS SAFs.

Note: Quarters and years with fewer than 25 discharges will not be shown.

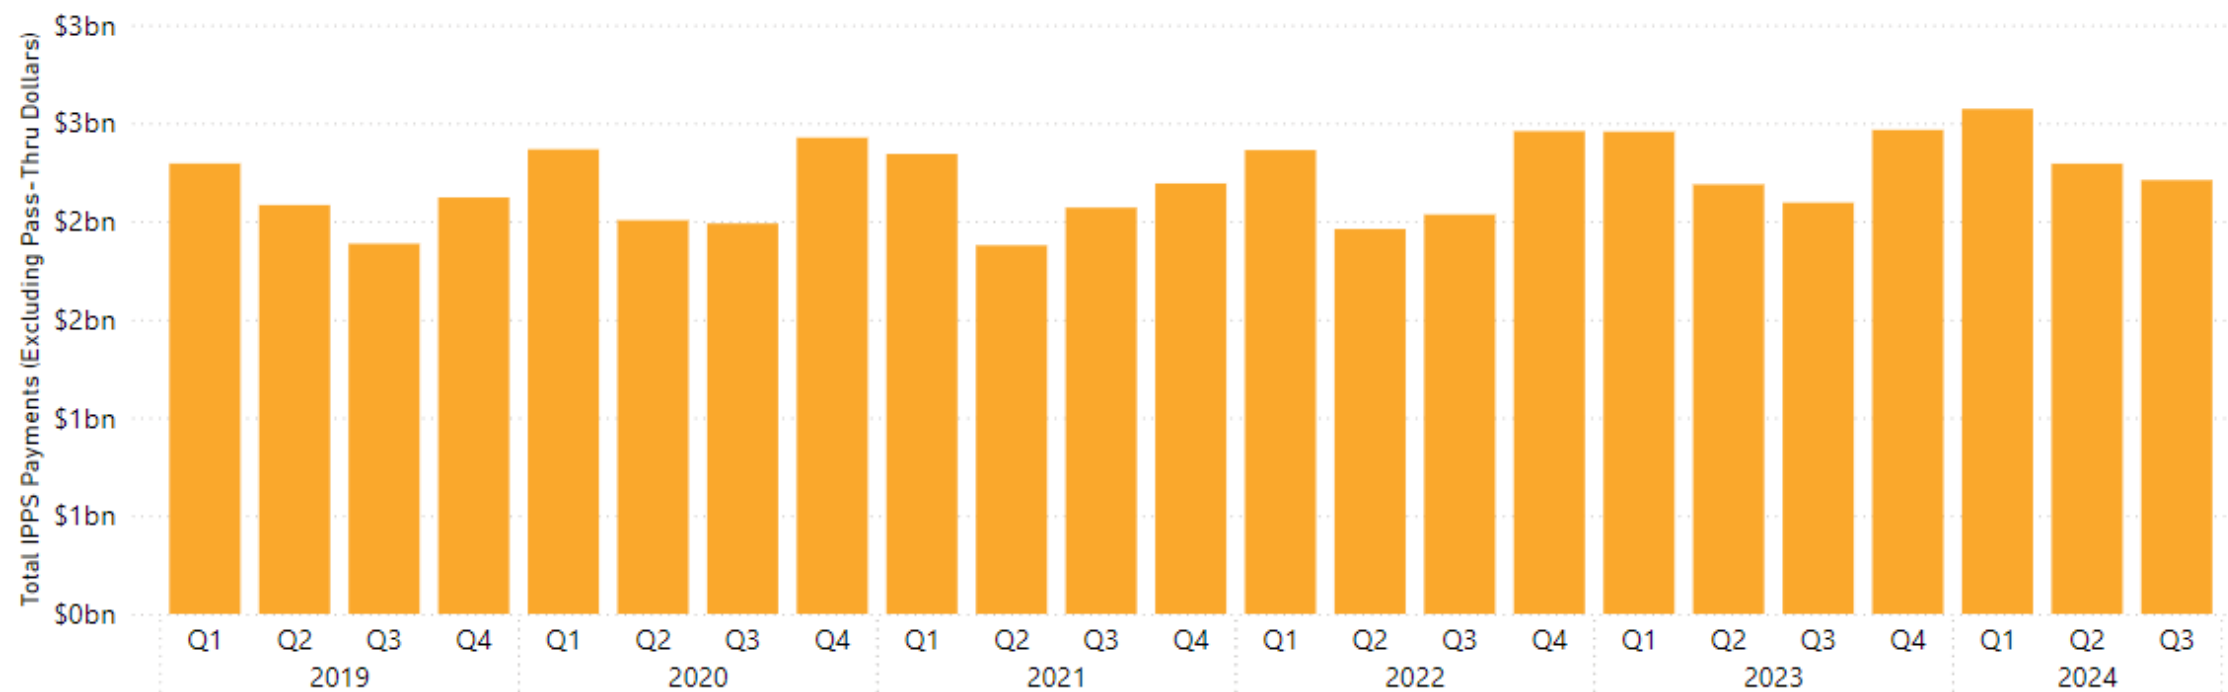

Total IPPS Payments by MS-DRG from 2019-2024Q3
